

A Webinar of the Project Development Programme (PDP) on Embedded PV Generation in Vietnam's Thriving Industry

18 May 2017, 10:00 – 11:00

Strong economic growth rates, increasing energy needs, a favourable feed-in tariff, and a friendly investment climate currently render Vietnam a highly promising market for renewable energy. Thanks to the successful implementation of reference projects, private actors have become increasingly interested in the market's potential and its rising demand for technical expertise and high quality products. This webinar organised by the Project Development Programme (PDP) aims to raise awareness of the characteristics of the market for renewable energy in Vietnam and to identify business opportunities for German companies. The webinar serves as a kick-off event for a subsequent information workshop and AHK business trip implemented by the German Energy Solutions Initiative of the German Federal Ministry for Economic Affairs and Energy (BMWi).

Agenda	
10:00 – 10:10	Introduction GIZ/PEP – Mr. Simon Bittner
10:10 – 10:20	Market introduction by AHK Vietnam AHK Vietnam – Mr. Nguyen The Dung
10:20 – 10:40	Presentation by GIZ/PEP Vietnam Vietnam PV Updates: <ul style="list-style-type: none">- Legal framework for solar power projects- Overview of solar PV development in Vietnam- GIZ/PEP support to embedded generation PV projects
10:40 – 10:50	PV in Vietnam's Cold Storage Sector: 300 kW PV Rooftop Reference System supported by GIZ/PEP Swire Cold Storage Vietnam – Mr. David Davies
10:50 – 11:00	Q&A + Follow-ups Information Workshop & AHK Business Trip
